

Adolescent Care

Adolescent Treatment That Works

At Elevate Point, we recognize that the recovery journey for adolescents is uniquely different from that of adults.

To effectively support our young clients, we have developed a dedicated adolescent wing within our facility, specifically designed to cultivate a safe, nurturing, and age-appropriate atmosphere.

Elevate Can Help

Adolescents encounter a myriad of challenges during their recovery process, which can include coping with academic expectations, navigating peer relationships, and grappling with the complexities of evolving identities.

By establishing a separate wing exclusively for adolescents, we are able to specifically address these issues. This tailored approach ensures that every young person receives care that truly resonates with their experiences, enhancing both relevance and impact.

Nothing should stop someone from living the life they've dreamt of.

Features of the Adolescent Wing

- **Age-Appropriate Therapy:** Our therapeutic offerings include group sessions and individual counseling tailored specifically for teens.
- **Safe and Supportive Environment:** The adolescent wing is designed to be a secure and non-judgmental space that encourages young individuals to express their thoughts and emotions openly.
- **Specialized Staff:** Our dedicated team comprises therapists, counselors, and support personnel who possess expertise in adolescent mental health and substance use disorders.
- **Creative and Recreational Spaces:** We have incorporated dedicated areas for creative expression, physical activity, and relaxation within the adolescent wing.
